Introduction

This guide shows how to leverage standard reports in Commerce center reporting to reconcile data across payments lifecycle.

Transaction reconciliation

To reconcile or research transaction level deposit/submission activity you need to review the [Deposit Detail report](#) which provides transaction level details of successfully submitted/deposited transactions.

Step 1: Find your transaction details

Find transactions in this report using **Merchant Order Number**. Use this report to verify all successful transactions processed against your own internal transactions report.

Step 2: Match it with your Net Total Deposit amount

The summation of the **Amount** column will match the Net Total Deposit Amount calculated using your Deposit Summary Report (Step 1 of Net financial activity reconciliation) for the same date range.

In the following example with select columns from the Deposit Details report, Total Net Deposit Amount calculation is represented.

Deposit Detail

Total Net Deposit Amount = 6539.30

Net Financial Activity reconciliation

To reconcile total net deposit amount for settled transactions and find total cost of transactions incurred over a reporting period

To do this, you need:

The [Deposit Summary report](#) to get a high-level view of your successful deposits/submissions for a date range grouped by fee categories and payment methods.

Step 1: Calculate your Net Total Deposit Amount

Filter the report on column **Charge Category Code** by values, SALE and REF. Sale amount will be a positive value , refund amount will be a negative value. To calculate Net Total Deposit amount , add all the values in the **Amount** column on the filtered results.

Step 2: Calculate your Total Fees and Adjustments Amount

Filter the report on column **Charge Category Code** by values other than SALE and REF.

- Add Interchange & Assessment Fees (IA) together.
- Add Processing Fees (PFEE) together.
- Add Chargeback adjustments to Fees and Adjustments.

To calculate Total Fees and Adjustments Amount, add all the values in the Amount column on the filtered results. Total Fees will provide insight into cost of transactions for that day, week, month.

Step 3: Calculate your Net Financial Activity

Net Financial Activity = Net Total Deposit Amount – Total Fees & Adjustments Amount

Deducting Total Fees and Adjustments from the Net Total Deposits will give you Net Financial Activity which will identify what your deposit should be into your bank account.

Note:

Deposits will be based on your funding instructions and dollar amounts shown may be affected by net funding or gross funding which may or may not match your deposits into your bank account.

In the following example with select columns from the Deposit Summary report, Total Net Deposit Amount, Total Fees and Adjustments and Net Financial Activity calculation is represented.

Deposit Summary											
Entity Type Code	Entity Identifier	Fund Transfer Instruction Number	Secure Bank Account Number	Presentment Currency Code	Payment Method Code	Charge Category Code	Charge Category Text	Settled Conveyed Code	Transaction Count	Amount	Settlement Currency Code
TD	1234567	4858086	XXXXX779	USD	DI	PFEF	Processing Fees	\$	0	-1.76	USD
TD	1234567	4858086	XXXXX779	USD	DI	IA	Interchange & Assessment Fees	\$	0	-159.88	USD
TD	1234567	4832226	XXXXX923	USD	DI	SALE	Settled Sales	\$	8	6547.62	USD
TD	1234567	4832226	XXXXX923	USD	DI	REF	Settled Refunds	\$	1	-8.32	USD

Total Net Deposit Amount = 6539.30
 Total Fees and Adjustments = -161.64
 Net Financial Activity = 6377.67

Bank Deposit transfer reconciliation

To reconcile your bank accounts by comparing bank statements and the net financial activity

To do this, you need:

The [Deposit Transfer report](#) summarizes the fund transfers that have been created and are pending, on-hold, rejected or scheduled for credit to your bank account during the reporting period.

Step 1: Calculate your Fund Transfer Amount

Filter the report on column **Funds Transfer Category Description** by Pending Funds Transfer and Merchant Activity Date Range, select the date that matches your date range from your Deposit Summary Report.

To calculate Total Fund Transfer Amount , add all the values of the **Amount** column on the filtered results.

Step 2: Match it with your Net Financial Activity amount

Total fund transfer amount will match the Net Financial Activity amount calculated using your Deposit Summary Report (Step 3 of Net financial activity reconciliation) for the same date range.

Note:

- The Funds Transfer Effective date will indicate when your deposits or fees will be deposited or deducted from your bank account.

- Effective Funds Transfer data will show what is being deposited in today's bank deposits or deducted from your bank account based on the Funds Transfer Effective Date.
- You can reconcile your bank statements by verifying Effective Funds Transfers (both credit and debit) over a specific date range.
- Deposits will be based on your funding instructions and dollar amounts shown may be affected by net funding or gross funding which may or may not match your deposits into your bank account.

In the following example with select columns from the Deposit Transfer report, credit and debit into the bank account are represented.

Deposit Transfer										
Entity Type Code	Entity Identifier	Fund Transfer Instruction Number	Merchant Bank Account Number	Presentment Currency Code	Funds Transfer Category Description	Fund Transfer Identifier	Merchant Activity Date Range	Fund Transfer Effective Date	Amount	Settlement Currency Code
TD	1234567	4858086	XXXXX0679	USD	Pending Funds Transfer	13758084127	2023-10-10 thru 2023-10-10	2023-10-11T00:00:00.000Z	-161.64	USD
TD	1234567	4832226	XXXXX9133	USD	Pending Funds Transfer	13758082700	2023-10-10 thru 2023-10-10	2023-10-11T00:00:00.000Z	6539.30	USD

Merchant Fees and Adjustment Amounts breakdown

To find granular breakdown of the merchant fees by interchange, assessment, and processing fees assessed during a specified reporting period

To do this, you need:

The [Charge Summary Report](#) which identifies fees assessed for services that were posted during the reporting period.

Step 1: Find Fees breakdown

Pivot on columns **Charge Category Code** ,**Charge Subcategory** and then select **Settled Total Charges** column to sum the values. This will give you granular breakdown of the fees in each category.

Step 2: Match it with your Total Fees and Adjustments Amount

The summation of the values will match the Total Fees and Adjustment Amount calculated using your Deposit Summary Report (Step 2 of Net financial activity reconciliation) for the same date range.

In the following example with select columns from the Charge Summary report, fees breakdown is represented.

Charge Summary Report																	
Charge Category Code	Charge Subcategory Text	Entity Type Code	Entity Identifier	Fund Transfer Instruction Number	Secure Bank Account Number	Settlement Currency Code	Merchant Service Fee Schedule Identifier	Pagmen Method Code	Interchange Qualification Code	Fee Text	Action Type Code	Unit Quantity	Unit Fee Amount	Amount	Rate Face Value	Settled Total Charge	Presentment Currency Code
